Journal of Fluid Mechanics Volume 512 **10 August 2004**

E. R. Damiano, D. S. Long & M. L. Smith	Estimation of viscosity profiles using velocimetry data from parallel flows of linearly viscous fluids: application to microvascular haemodynamics	1
J. Peng & K.-Q. Zhu	Linear stability of Bingham fluids in spiral Couette flow	21
C. J. Delo, R. M. Kelso & A. J. Smits	Three-dimensional structure of a low-Reynolds-number turbulent boundary layer	47
B. Galletti & A. Bottaro	Large-scale secondary structures in duct flow	85
S. R. Hodges, O. E. Jensen & J. M. Rallison	Sliding, slipping and rolling: the sedimentation of a viscous drop down a gently inclined plane	95
P. Aussillous & D. Quéré	Shapes of rolling liquid drops	133
E. J. Fitzgerald & E. J. Jumper	The optical distortion mechanism in a nearly incompressible free shear layer	153
S. S. Girimaji	A new perspective on realizability of turbulence models	191
T. Kataoka & M. Tsutahara	Transverse instability of surface solitary waves	211
P. K. Notz & O. A. Basaran	Dynamics and breakup of a contracting liquid filament	223
G. Haller	Exact theory of unsteady separation for two-dimensional flows	257
T. Lee & P. Gerontakos	Investigation of flow over an oscillating airfoil	313
E. Lauga & T. R. Bewley	Performance of a linear robust control strategy on a nonlinear model of spatially developing flows	343
BOOK REVIEW		
Relativistic Numerical Hydrodynamics, by J. R. Wilson & G. J. Mathews		375
INDEX TO VOLUME 512		379
SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS		380
